RE: Notice of Intent (NOI) File No. P-2008-043 MD-03, Fourth Review Responses
Request for Extension
Centennial Uranium Project, Weld County

Dear Mr. Bird:

Powertech (USA) Inc. (Powertech) requests another extension for our response to the P-2008-043 NOI MD-03 Fourth Review completeness issues outlined by DRMS in its letter to Powertech dated March 18, 2010. Powertech was granted approval from the Environmental Protection Agency (EPA) for its Class V Underground Injection Control Permit to re-inject produced pump test water on December 3, 2010. Following appeals, the EPA decided to withdraw the final permit and re-issue a revised draft permit. EPA has reissued the draft permit and the public comment period closed June 10, 2011. We anticipate receiving the new and revised permit later this year.

Powertech still intends to conduct the aquifer pump test for the Centennial Project. However, it is becoming more doubtful that the test will be performed in 2011. Therefore, it may be during the warm months of 2012 before the aquifer pump test can be performed.

If you have any questions or require additional information, please contact the undersigned at 303-790-7528 or Mike Beshore at 970-282-7777.

Respectfully yours,

Richard Blubaugh
